LinkedIn: linkedin.com/in/tejashr0716 | **GitHub:** github.com/tejashr0716 | **LeetCode:** leetcode.com/u/tejashr0716

SUMMARY

2026 graduate skilled in Java, Spring Boot, microservices architecture, event-driven systems, React, REST APIs, SQL/NoSQL databases, and cloud-native Docker containerization. Experienced in navigating existing codebases, taking end-to-end ownership of deliverables, resolving software defects, contributing to design discussions, and collaborating in agile teams. Eager to contribute as Specialist Programmer at Infosys.

TECHNICAL SKILLS

Languages: Java (Java 21/17), Python, SQL, C++, JavaScript (ES6+), Scala Fundamentals, HTML5, CSS3
Frameworks & Back-End: Spring Boot 3.3, Spring Data JPA, Spring Security 6, Hibernate, RESTful APIs, Node.js
Front-End & Full Stack: React 18, TypeScript, Vite, Tailwind CSS, Component Architecture, Responsive Web UI
Distributed Systems & Messaging: Event-Driven Architecture, Transactional Outbox, Kafka Concepts, Redis, RabbitMQ
Databases & DevOps: PostgreSQL, MySQL, H2 In-Memory, Docker, CI/CD (GitLab, GitHub Actions), Linux, Git
Testing & Quality Gates: JUnit 5, MockMvc, pytest, Concurrency Profiling, Defensive Error Handling, Code Reviews

EXPERIENCE

Full Stack Developer Intern Feb 2026 – Aug 2026
KodNest *Bengaluru, India*

- Took engineering ownership of **3 modules and 8 REST endpoints** in existing codebases, resolving software defects, applying PEP 8 standards, and accelerating delivery with AI tools (GitHub Copilot / Cursor) in Agile sprint cycles.
- Reduced median reporting API latency by **37.8% (69.09 ms to 42.97 ms)** on an **80,001-ticket MySQL dataset** by profiling execution bottlenecks, authoring technical design notes, and maintaining GitLab CI/CD pipelines.

Web Developer Intern Aug 2025 – Jan 2026
SkillXAcademy *Bengaluru, India*

- Enhanced and adapted existing software components across **6 responsive interfaces and 5 REST endpoints**, standardizing error/info logging, participating in peer code reviews, and validating output.
- Reduced median warm catalog revisit latency by **21.8% (99.77 ms to 78.05 ms)** across 30 benchmark pairs by engineering response caching, eliminating redundant network calls, and enforcing regression tests with pytest.

PROJECTS

Event-Driven Commerce Intelligence Platform GitHub
Java 21, Spring Boot 3.3, React 18, TypeScript, H2/PostgreSQL, Docker, JUnit 5

- Engineered row-level pessimistic locking (`SELECT FOR UPDATE`) guaranteeing zero overselling across 20 concurrent threads at **453.01 req/sec peak throughput** and **6.70 ms P50 latency (67.02 ms P95)**.
- Implemented Transactional Outbox dual-write safety and client UUID `Idempotency-Key` caching with **0.69 ms P50 replay latency**, dead-letter queue (DLQ) routing, and a **15-test passing JUnit 5 suite (100% pass rate)**.

ChandyStore — Distributed Consensus Key-Value Store & Raft Lock Manager GitHub
Python, FastAPI, C++17, Redis, RabbitMQ, PostgreSQL, pytest

- Designed Raft consensus engine with Martin Kleppmann monotonic fencing tokens delivering **287.8M locks/sec** and CRC32 log verifiers with **1.10M ops/sec** throughput with zero split-brain risk.
- Enforced distributed mutual exclusion and linearizable state machine replication covered by a **100% passing pytest regression suite**.

EDUCATION

The Oxford College of Engineering 2022 – 2026
Bachelor of Engineering in Information Science and Engineering; CGPA: 8.01 / 10.0 *Bengaluru, India*

CERTIFICATIONS & TECHNICAL CREDENTIALS

IBM DevOps and Software Engineering Professional Certificate — IBM
Microsoft Back-End Developer Professional Certificate — Microsoft, Coursera
Mastering REST APIs with FastAPI — Packt, Coursera
Introduction to Data Analysis Using Python — Google, Coursera
